Good Evening Jackie,

Thank you again for providing the two proposals for agricultural interim BMPs on behalf of New York. I have shared them with the modeling team and we have had several discussions today during our review. Unfortunately, we have not been able to easily access several of the reference documents cited with the proposals. I was able to share the following two Cornell University references that you had provided earlier to us:

- Upper Susquehanna River Watershed Cropland P Balances (11-23-2008)
- Nitrogen balances for the New York Upper Susquehanna River Watershed: Implications for manure and fertilizer management

If you could provide the other non-CBPO references cited, we would appreciate the assistance in locating them. I will be presenting at the Mid-Atlantic Crop Management School in Ocean City, Maryland for the next several days, but I will be online and in contact with the Bay Program Office during that period.

Thank you in advance for your assistance, and I look forward to speaking with you later this week. Thanks!

Mark P. Dubin
